

Soon Ho Choi

Research Curriculum Vitae

sosaror@gmail.com | GitHub: Snow0821 | LinkedIn: snowian
github.com/Snow0821 | linkedin.com/in/snowian

RESEARCH INTERESTS

Discrete and integer neural networks; logic-gate networks; binary and ternary quantization; efficient neural representations.

EDUCATION

Kookmin University | 2023.08 - 2025.08

M.Eng. in Artificial Intelligence

Handong Global University | 2010.03 - 2019.08

B.Eng. in Computer Science

SELECTED RESEARCH

OSLGN | 2025

Exploring neural networks through the selection of operands and logic operations.

Public research repository

Ternary $\rightarrow$ binary | 2025

Investigating how ternary representations can be expressed in a binary computing system.

Public research repository

Sign quantization | 2024

Comparing sign-quantized layers with conventional linear layers in small neural networks.

Public research repository

CONFERENCE CONTRIBUTION

Choi Soon Ho and Soo-Yeon Yoon. Comparing accuracy of sign-quantized layers with linear layer in small models. Proceedings of the KICS Symposium, June 19, 2024.

TEACHING & PRACTICE

Freelance developer and AI instructor (2023 - present). Teaching areas: Python, C++, data structures, algorithms, practical AI, and web development.
